COLOCATION AT SDC

For maximum reliability and interconnection of your business

SDC Sofia is data center campus of the global independent telecom operator **Neterra**.
The newest building in the campus is Building 2 which uses all the benefits of the already established business and telecommunications infrastructure - **connectivity with all existing customers of Neterra** and **access to high-speed, secure and redundant over 8000 international networks and routes.**

- Sofia, Bulgaria
- TIER |||
- 2560 m2
- 3 MW

Neterra owns two more data centers - **SDC Ruse** and **SDC Stolnik.**
All services can be replicated in an alternative geographical point by the various data centers of the company (so-called disaster recovery). Businesses can also take advantage of the company's **wide portfolio** of **other telecommunications services,** relying on proactive **24/7 professional support.**

LOCATION, LOCATION, coLOCATION
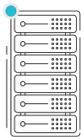

Benefits of a data center

- Keep focus on your core business, allowing us to take care of your equipment
- Have a reliable, uninterrupted and redundant service
- Save money on the purchase of specialized equipment and your own system support team
